

BELLA GAIA®

BEAUTIFUL EARTH

"Out of this World"

- USA Today

***"Discover
what it's
like to be an
Astronaut"***

- Washington Post

***"haunting classical/
world fusion music...
a mesmerizing
spectacle that
should not be
missed"***

- Huffington Post)

BELLA GAIA (Beautiful Earth) is an unprecedented audio-visual experience that combines NASA satellite imagery of Earth, timelapse nature photography, & live world music and dance on stage. Inspired by astronauts who spoke of the life changing power of seeing the Earth from space, director-composer Kenji Williams' award winning BELLA GAIA successfully simulates the Overview Effect from space flight, by using NASA supercomputer data-visualizations with an "iridescent landscape of gossamer melodies and labyrinthine rhythms" (Nooga.com) to explore the relationship between humans and nature through time and space.
